## WORKSHOP SOLVENTS, DEGREASERS, LUBRICANTS & CLEANERS, VEHICLE MAINTENANCE, ENGINE ADDITIVES & COOLANTS

| Vehicle Maintenance & Engine Additives                  |                                                                                                                                                                                       |
|---------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Brake Fluid                                             | QAT Brand brake fluids - DOT 3, DOT 4, Super DOT 4.                                                                                                                                   |
| QAC-111 Diesel Fuel Treatment                           | QAT Brand diesel fuel treatment and biocide offering high performance especially on low sulphur fuels. Contains no hydrocarbons, non corrosive and non flammable.                     |
| Q Biocide Diesel Diesel Fuel Algae & Bacteria Treatment | QAT Brand diesel biocide formula for use in storage situations where water promotes the growth of microbial organisms,                                                                |
| Q Fire Fuel Injector Cleaner                            | QAT Brand detergent based fuel injector cleaner and fuel treatment suitable for diesel and petrol engines. Removes carbon build-up from pistons and valves and lubricates the system. |
| Q Flush Engine Oil Flush                                | QAT Brand single dose cleaner and preparation additive for pre oil change that improves engine performance and oil longevity.                                                         |
| Q Plus Premium Petrol Injector Cleaner                  | QAT Brand premium fuel injector cleaner and fuel treatment suitable for petrol engines. Increases power, acceleration and fuel economy.                                               |
| Q Radflush                                              | QAT Brand radiator system flush and descaler for use when changing engine coolant.                                                                                                    |
| Coolants                                                |                                                                                                                                                                                       |
| Heavy Duty Diesel Engine OEM Compatible Type A Coolant  | Extended life OEM compatible. Highly recommended for use in heavy duty diesel engines and light duty diesel for complete cooling system protection.                                   |
| Hybrid Acid Technology Type A Coolant                   | Automotive & Light Diesel Extended Life Hybrid Engine Coolant - Green or Red.                                                                                                         |
| V2000 Type A Coolant                                    | Conventional Anti Boil/Freeze Coolant - Green                                                                                                                                         |
| V2001 Type A Coolant                                    | Organic Long Life Anti Boil / Freeze Coolant - Green or Red                                                                                                                           |
| Q Guard Type B Coolant                                  | Conventional rust & corrosion inhibitor (non glycol) coolant for automotive vehicle use that exceeds the requirements of AS 2108.1:2004 - Green.                                      |
| RCI 2001 Type B Coolant                                 | Organic Long Life Rust & Corrosion Inhibitor - Green or Red                                                                                                                           |
| Demineralised Water                                     | Purified water that has had most or all of its mineral and salt ions removed, such as Calcium, Magnesium, Sodium, Chloride, Sulphate, Nitrate and Bicarbonate.                        |

## Workshop Solvents, Degreasers & Cleaners

|                                |                                                                                                                                                                                                                                                       |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2K Thinners                    | Pure thinners for use with 2K products.                                                                                                                                                                                                               |
| Acetone                        | Used for thinning polyester resin, dissolving two-part epoxies and superglue before they harden. As a heavy-duty degreaser, it is useful in the preparation of metal prior to painting. Active ingredient in nail polish remover.                     |
| Caustic Soda                   | For use in hot tanks for degreasing of engine parts, and for cleaning of heavily soiled concrete floors.                                                                                                                                              |
| Floor Plus                     | Heavy duty powdered concrete floor cleaner. Cuts through grease and oil.                                                                                                                                                                              |
| GP/All Purpose Thinners        | Used for thinning of acrylic and enamels, lacquers, primers and automotive paints and screen-printing. Also for paint remover and spray equipment cleaner, cleaning up spills and cleaning solvent.                                                   |
| Hot Wash Powder                | A high quality, specially developed hot wash powder designed for use in specialist part washing machines.                                                                                                                                             |
| HQB Degreaser                  | Quick Break Biodegradable Degreaser is a liquid detergent formulated for use with oil interceptors and hydrocarbon recovery systems.                                                                                                                  |
| Isopropanol Alcohol            | Commonly used solvent for cleaning. Does not contain CFCs or chlorinated solvents. Used as a water-drying aid. Cleans a variety of soils, including flux residues, light oils, polar, organic and ionic residues and for cleaning electronic devices. |
| ITC Carbon Remover             | Heavy duty solvent cleaner ideal for removal of stubborn carbon type deposits burner tips, fuel injectors and all components fouled by carbon, resin or varnishes.                                                                                    |
| Kerosene                       | A light, oily liquid obtained during the distilling of crude oils. Commonly used as heater fuel and as an engine degreaser or surface cleaner.                                                                                                        |
| Methylated Spirits             | Has a variety of uses including window cleaning, camping fuel and solvent to remove ink and stains from clothing and upholstery. Also commonly used with Shellacs.                                                                                    |
| Prepsol (Wax & Grease Remover) | A mild solvent safe on most paintwork. Used to clean dirt, grease, silicone, tar, road grime natural oils, etc, from panels and equipment.                                                                                                            |

| Workshop Solvents, Degreasers & Cleaners Continued |                                                                                                                                                                                                                                                                            |
|----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Q Biodegradeable Citrus Degreaser                  | Biodegradable quick breaking degreaser, effective for all commercial, industrial & auto applications. Uses naturally derived d'limonene (from orange citrus oil) and biodegradable surfactants. Environmentally friendly.                                                  |
| Q Bitumen & Tar Remover                            | Active cleaning formula for removal of bitumen/tar, heavy oils and grease, in both hot and cold climates. Emulsifies well and brakes at a high rate.                                                                                                                       |
| Q Brake Cleaner                                    | Solvent based liquid designed for cleaning brake and clutch parts. Fast drying solvents that evaporate quickly and leave no residue, leaving parts ready for immediate re-assembly.                                                                                        |
| Q Concrete Remover                                 | Biodegradable alternative to hydrochloric acid for dissolving concrete and cleaning brickwork. Can be used to remove cured cement, concrete, mortar, grout and stucco.                                                                                                     |
| Q Degrease                                         | Water based concentrated degreaser suited to automotive and general applications. Ideal for general workshop, engine bay, light industrial degreasing.                                                                                                                     |
| Q Parts Wash                                       | Non flammable low evaporation solvent fluid for use in for use in parts baths, tubs and parts washing machines.                                                                                                                                                            |
| Q Prep Solvent Degreaser                           | For removal of pre-delivery wax, internal glue residues and excess anti corrosion treatment. Designed for initial surface preparation before painting. Works well on the removal of wax, grease, silicone, dirt, tar, insect remnants, road film and pin stripe adhesives. |
| Q Qik Klean Solvent Degreaser                      | Blended solvents and surfactant for difficult and heavy duty grease and grime removal. Developed to offer effective degreasing and cleaning in workshops for automotive, heavy industrial and mining companies.                                                            |
| Q Solv High Performance Solvent Degreaser          | Highly concentrated solvent based degreaser for removing oil, grease and bitumen/tar. Can be used for general domestic cleaning as well as for heavy duty cleaning in the automotive and manufacturing industries.                                                         |
| Q Supa 160 Heavy Duty Degreaser                    | Water based concentrated caustic degreaser ideal for heavy duty, industrial, agricultural and workshop jobs.                                                                                                                                                               |
| Quick Clean                                        | Heavy duty low foaming degreaser which cleans quickly and effectively.                                                                                                                                                                                                     |
| Spin Tank Turbo Wash                               | Powdered detergent for hotwash machines.                                                                                                                                                                                                                                   |

|                                |                                                                                                                                                                                                                                 |
|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Underbody Cleaner              | A highly concentrated underbody, under bonnet cleaner. Specifically formulated for the removal of oil, grease, and dirt etc.                                                                                                    |
| Value Plus Gun Wash            | Blended cleaning solvent, suitable for cleaning spray lines, guns and other equipment.                                                                                                                                          |
| Value Plus Mineral Turpentine  | A hydrotreated light distillate of petroleum. Consists of a complex mixture of highly refined hydrocarbon distillates. Can be used for thinning of oil based paints, cleaning of brushes and rollers.                           |
| Value Plus Parts Wash          | Non flammable low evaporation solvent fluid for use in for use in parts baths, tubs and parts washing machines.                                                                                                                 |
| Value Plus Ultrasonic Cleaner  | Used in ultrasonic cleaning machines to assist with degreasing.                                                                                                                                                                 |
| W.B.2 Extra Strength Degreaser | A water based solvent degreaser for removing heavy grease and grime from badly soiled surfaces. Leaves no residue, is bio-degradable and odourless. Not to be used on reactive metals such as aluminium due to high alkalinity. |
| Workshop solvent/brake cleaner | Various brands (Q55/X55/Value Plus). Fast drying, low residue contact cleaner. Relatively weak solvent unlikely to affect the surface of most materials.                                                                        |

## Lubricants

|                                   |                                                                                                                                                                                                                                                                                                                       |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Lanotec Heavy Duty Liquid Lanolin | Lubricates and protects high-speed and load-bearing chains (non-fling and non-webbing), wire ropes, slings and pulling cables. Protects all electrical equipment on machinery, including battery terminals, boxes and connectors. Provides long-lasting lubrication of moving parts in highly-corrosive environments. |
| Q Lubex                           | A versatile lubricant and penetrant that repels moisture, providing excellent corrosion protection to metal surfaces.                                                                                                                                                                                                 |
| Q Water Dispersing Fluid          | A dewatering fluid effectively displacing moisture, penetrating and lubricating for an extended period of time for indoor or outdoor applications.                                                                                                                                                                    |
